✉️ aguilaradri4@gmail.com

Summary

Emmy-winning multi-skilled producer specializing in data visualization and internal reporting application design and development. Co-architect and Lead Designer of the ABC Price Tracker. Has extensive experience delivering high-impact data-driven motion and interactive design for digital, broadcast, explainers and documentaries.

Leads visualization and motion design supporting eight broadcast stations across the country. Combines advanced JavaScript/Svelte and R development with editorial judgment, creative direction and cross-functional leadership. Proven record of spearheading major company initiatives, including O&I/BERG programming and budget management for large-scale event planning.

PROFESSIONAL EXPERIENCE

Visual Content Producer/Data Journalist

Chicago, IL

11/2019 – Present

- Designed and engineered custom JavaScript/Svelte and R-based tools to streamline data analysis and reporting workflows, generating topical data-leads for newsroom teams.
- Pitched, produced and executed original data-driven explainers and visual stories, including extensive COVID-19 coverage aimed at combating misinformation.
- Engaged key stakeholders, including Executive and Line Producers, Data Director, Graphics and Digital teams to plan and deliver animations and visual packages for major TV specials and investigations, including A Critical State of Mind, California Dream, Our Chicago: Freedom Day, Our America: Green Guardians, California's Case For Reparation, Killer High and more.
- Spearheaded major BERG initiatives, including serving as Head of Pride Month Event Planning at Disney, leading cross-functional coordination, budgets management, programming strategy, communications and execution.
- Developed and implemented new processes to reimagine local television news through emerging media, animation, motion graphics, data, interactives and special effects.
- Collaborated with the data journalists to deliver quality visual language, breaking down complex data and topics that supported both quick daily turns, special projects and in-depth investigations. Topics ranged from environmental data to police accountability.
